

# Lunch Tray Recycling Initiative

We need your help to reduce our waste through an exciting new initiative to recycle our aluminium

## 01 - Give us all of your Ka Ora, Ka Ako foodscraps

Please ensure every tray's food scraps are scraped out and into the container or bag provided so that they can be taken away by a School Lunch Collective team member. We actively work to compost as many scraps as we can.

## 02 - Let us take your trays

Once lunch trays have been scraped of as much food waste as possible, stack the trays back into the boxes they came in and a School Lunch Collective team member will take the box away.

## 03 - Start a movement

We hope to produce a positive ripple effect from this initiative - not only can your school community make a substantial environmental impact, but we will also instil valuable lessons of responsibility and sustainability in ākonga. With your participation, we can turn this initiative into a resounding success and be a shining example for other schools in the Ka Ora, Ka Ako programme.
