

# Lunch Tray Recycling Initiative

We need your help to reduce our waste by further recycling our aluminium

## 01 - Give us all of your Ka Ora, Ka Ako foodscraps

Please ensure every tray's food scraps are scraped out (with sporks and snack packaging together with the food waste). Place this waste into a cambro box with a bin liner provided so that they can be taken away by a School Lunch Collective team member. We actively work to compost as many scraps as we can.

## 02 - Let us take your trays

Once lunch trays have been shaken out of as much food waste as possible, stack the trays back into a separate cambro box and a School Lunch Collective team member will take the box away.

## 03 - Start a movement

Many schools are already doing amazing things around waste recycling and teaching ākonga about environmental impacts. With your participation, more trays will be recycled, turning this initiative into a resounding success and supporting schools in the great work being achieved normalising sustainable approaches towards waste in our communities.
